The main goal of knowledge translation (KT) is to ensure that diverse communities benefit from academic research results through improved social and health outcomes. But despite growing interest in researcher-user collaborations, little is known about what makes or breaks these types of relationships. Knowledge Translation in Context is an essential tool for researchers to learn how to be effective partners in the KT process.u003cbr /u003eu003cbr /u003eDrawing on expertise and studies from across the globe, Elizabeth Banister, Bonnie Leadbeater, and Anne Marshall outline a variety of perspectives on KT processes. Case studies outline the uses of KT in many contexts, including community, policy, Indigenous, and non-profit organizations.
